Moxy Budapest Downtown to Open in 2026

International News

27/05/2025

Forestay Group has organised a topping-out ceremony of the Moxy Budapest Downtown, a 283-room hotel set to open in spring 2026 on Budapest's historic Kazinczy Street.

With structural works now complete, the project is on schedule for delivery in Q2 2026. The project transforms a previously underutilised site, once home to the Hungarian Dance Academy, into an energy-efficient hotel targeting BREEAM Excellent certification. This achievement will make it Europe's second Moxy to attain such a high sustainability rating and Hungary's first to receive full, not just design-level, certification.

The project also features extensive green urban integration, with over 70 trees to be planted around the building and revitalisation efforts planned for the adjacent Kazinczy promenade. At the same time, green rooftop areas and a fully planted courtyard will help mitigate urban heat and boost biodiversity.
